

IMPORTANT Descriptions on EE 492 ENGINEERING PROJECT

PROJECT Determination:

- Students can appeal directly to the instructors to perform a project in the subjects they prefer.
- The students shall cover the necessary components and other manufacturing costs and expenses costs.

ENGINEERING PROJECT PROCESS:

- In this course, a Project report has to be prepared. The instructions about the report format can be reached via <https://eng.yeditepe.edu.tr/tr/elektrik-ve-elektronik-muhendisligi-bolumu/dersler/3751> or <https://eng.yeditepe.edu.tr/en/electrical-electronics-engineering-department/dersler/3752>.
- Report Template and Format Guideline must be read before the start of the Project.
- The reports you have prepared are examined first. After they are approved, the reports are sent to the department secretariat. Therefore, on the date announced at the beginning of the period, the reports must be submitted to us in writing. Late reports are not evaluated, and the students are considered failed.
- The approved project reports should be compatible with the format template and are checked using Turnitin, and if there is >%20 similarity, the report is considered failed.
